

NEW FEATURES TO THE NFJP CLIENT DATA SOFTWARE ARE LISTED BELOW (most recent first):

July 2008: "Release of Information" form was modified to remove portion of section 1 Spanish translation which limited use of data to 2 years.

July 2008: Modified WIASPR ending date limitation which prevented reporting periods that crossed 2 or more calendar years. Ending date limitation is now set so that the ending date is at least one day more than starting date, otherwise an error is generated. Logically, all exit cohorts should be for six quarters.

June 2008: Poverty Guidelines changed to reflect the April 25 and June 10, 2008 (modification) U.S. Department of Labor (DOL) publication.

May 2008: WIASPR/Data Validation Extract, (bug fix) corrected problem with not including one quarter of follow-up records when using rolling quarters.

February 2008: WIASPR, (bug fix) corrected problem with follow-up records incorrectly flagged as errors when using 6 quarters instead of program year for the reporting period.

January 2008: Poverty Guidelines changed to reflect the January 23, 2008 U.S. Department of Health & Human Services (HHS) publication.

December 2007: Referral Report, (bug fix) inability to print corrected.

November 2007: Referral check boxes are available on the Admission and Exit Detail screens. Marking these boxes will open a small window for entering the name of the referring/referred agency.

November 2007: An on-screen Referral Form appears in the Exit Detail when the Referral check box is marked and "Yes" is selected.

November 2007: The software was upgraded to Microsoft Visual FoxPro Version 9 (from version 8). The "Setup" file was generated using "InstallShield" Version 12. Compatibility for Windows Vista is included.

November 2007: The statement for Pell Grant unavailability was added to Page 3 of the Classroom Training Agreement. This statement will print unless the check box for Pell Grant is marked.

November 2007: A "Recall" button was added to the "Office Page". Its function is to recover previously deleted office records (deleting some office records can affect reports adversely).

November 2007: A Referral Report is now available from the Reports Menu or Standardized Reports Button. This report lists all referrals to or from the selected office during a select period of time. It includes the client's name, ID, enrollment date or exit date, and the referring or referred agency name.

November 2007: The Self Certification Form has an updated EEO statement.
